CAREER OUTLOOK

General programming and design career outlooks remain bright. In addition to careers in a dedicated discipline, programming knowledge is fundamental to STEM and many technology-based jobs.

ENGINEERING
Increased applicant availability has not diminished business appetite for all engineering disciplines. Programming jobs are projected by BLS to grow 24% over the next decade, much faster than average.

WEB DESIGN
Web Design - Web design jobs are projected by BLS to grow 15% over the next decade, much faster than average.

HELPFUL PERSONAL SKILLS

All engineering and design disciplines require some ability in creativity, problem solving, and critical thinking. Your mix of other soft skills like visualization, verbal communication, active listening, team-work, leadership, collaboration, and writing will help define your ideal role in these disciplines and ability to climb the career ladder.
